PROFESSIONAL SUMMARY

Aspiring Data Scientist and AI & Data Science undergraduate with strong foundations in machine learning, deep learning, and data analytics. Experienced in data preprocessing, feature engineering, model development, evaluation, and deployment. Skilled in Python, SQL, Flask, recommendation systems, and building AI-driven applications. Passionate about transforming data into actionable insights through scalable and intelligent systems.

EDUCATION

- 2023-2027 B.Tech Artificial Intelligence and Data Science
CGPA : 8.81
- 2022-2023 Class XII with 95% Ponjesly Public Matric Higher Secondary School

TECHNICAL SKILLS

Programming Languages : Python, SQL, HTML, CSS, Javascript

Data Analysis : Numpy, Pandas, Scikit-learn.

Machine Learning : Model development & evaluation, supervised & unsupervised learning, recommendation systems, feature engineering, cross-validation, hyperparameter tuning.

Deep Learning : Neural Networks, TensorFlow, Keras.

Frameworks & Tools : Excel, PowerBI, Apache Kafka, Git, GitHub, MySQL, Statistics, VS Code

Modeling Techniques : SVD++, TF-IDF, Clustering (KMeans), RFM Analysis

WORK EXPERIENCE

Data Science Intern – AK Infopark Pvt. Ltd (Jun 23, 2025 – Jul 23, 2025)

- Developed a hybrid recommendation system using SVD++, TF-IDF, and AI strategies (RFM, popularity, price, location).
- Built and deployed a Flask-based ML app with preprocessing, feature engineering, and model evaluation.

PROJECTS

1. Product Recommendation System

Built a hybrid recommendation system using SVD++ and TF-IDF with advanced strategies like RFM analysis, location-based personalization, and price sensitivity. Developed and deployed a full-stack Flask application for end-to-end data processing and model evaluation.

2. Smart Agriculture System

Built an IoT-based irrigation prediction system using Decision Tree and Logistic Regression, achieving 98% accuracy and identifying soil moisture as the key factor for optimizing water usage.

3. AI Disease Prediction

Built a disease prediction web app using Flask and Decision Tree, supporting 100+ diseases with dynamic symptom selection and real-time prediction interface.

CERTIFICATES

- Cloud Computing – NPTEL
- Google Cloud Data Analytics – Google
- Generative AI – IBM
- Problem Solving – HackerRank

LANGUAGES

- English
- Tamil
